

JANITH SAMARASINGHE GUNASEKARA

Undergraduate Full-Stack Developer

Colombo, Sri Lanka | janithsgunasekara003@gmail.com | 070 325 4385 | Portfolio | GitHub | LinkedIn

PROFILE SUMMARY

Undergraduate Full Stack Developer pursuing a BSc (Hons) in Information Technology at the Sri Lanka Institute of Information Technology (SLIIT). Experienced in designing and developing web and mobile applications using modern technologies including Spring Boot, the MERN stack, Next.js, Java, PHP, C++, R, and SQL. Passionate about building scalable, high-performance solutions with clean architecture and user-focused design, backed by strong problem-solving ability and a commitment to continuous learning

EDUCATION

BSc (Hons) in Information Technology

Nov 2023 – Present

Sri Lanka Institute of Information Technology (SLIIT)

TECHNICAL SKILLS

Programming & Query Languages: Python, R, Java, JavaScript, PHP, SQL, Kotlin, C, C++

Web & Full-Stack Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, Spring Boot, RESTful APIs, Microservices Architecture

Mobile Development: Android Development (Kotlin/Java), Cross-platform concepts, API Integration, SQLite

Frontend Development: React.js, Next.js, HTML, CSS, Tailwind CSS, Responsive UI/UX Design

Backend Development: Node.js, Express.js, Spring Boot, PHP, Java Servlets

Databases: MySQL, MongoDB, Oracle, SQLite

Tools & Platforms: Git, GitHub, VS Code, Postman, Figma

Concepts: Object-Oriented Programming (OOP), MVC Architecture, REST APIs

PROJECTS

Smart Campus Operations Hub – Resource Catalogue & Asset Management

2026

React · Spring Boot · Java · MongoDB · REST API · JWT

- Built a centralized resource and asset management system for campus equipment and facilities.
- Implemented asset cataloguing, lifecycle tracking, search/filter functionality, and resource allocation workflows.
- Integrated resource validation with incident management modules to ensure accurate asset references.
- Developed role-based administrative controls and reporting features for efficient asset oversight.

UNI EATS – Campus Food Ordering System (Food Menu Management)

2026

React · Node.js · Express · MongoDB · JWT · Multer · MERN

- Developed and maintained the food menu management module, including menu item CRUD operations.
- Implemented food categorization, pricing, availability management, and image upload functionality.
- Built search and filtering features to enhance menu accessibility and user experience.
- Integrated menu management with the overall food ordering workflow and administrative dashboard.

<u>Tech Stock – Online Tech Items Inventory Management System</u> <i>React · Node.js · Express · MongoDB · JWT · Multer · MERN</i> - Developed user and product management modules for an online tech shopping platform. - Implemented JWT authentication, role-based access control, and full CRUD operations for users and products. - Integrated image upload functionality and REST APIs for efficient inventory management. - Built a scalable MERN stack e-commerce system with secure and structured data handling.	2026
<u>Portfolio Website</u> <i>HTML · CSS · JavaScript · Tailwind CSS · GitHub Pages</i> - Designed and deployed a personal portfolio site showcasing projects, skills, and contact details. - Built responsive hero, about, projects, skills, and contact sections with a searchable project grid. - Integrated CV download, mail-to contact form, social links, and custom domain deployment.	2026
<u>Pet Care Plus – Animal Clinic Management System</u> <i>React · Node.js · Express · MongoDB · JWT · Multer · MERN</i> - Developed user, pet, and resource management modules for a veterinary clinic management platform. - Implemented JWT-based authentication, pet profile management, and role-based access controls. - Built CRUD functionalities for clinic resources, user accounts, and pet records. - Integrated REST APIs and MongoDB for secure and efficient data management.	2025
<u>Well Nest – Health & Well-being Mobile Application</u> <i>Kotlin · XML · SQLite · Android Studio</i> - Developed an Android wellness application using Kotlin with offline data management through SQLite. - Implemented user profile management, wellness tracking, and CRUD functionalities for health-related records. - Designed responsive mobile interfaces and optimized application performance for a smooth user experience. - Applied Android development best practices to ensure maintainability, reliability, and usability.	2025
<u>ELE RESCUE – Elephant Train Accident Prevention System (UI/UX Design)</u> <i>Figma · UI/UX Design · Wireframing · Prototyping</i> - Designed a UI/UX solution to support elephant conservation and help reduce train-related wildlife accidents. - Created wireframes, user flows, reusable components, and interactive prototypes using Figma. - Applied accessibility, visual hierarchy, and user-centered design principles to improve usability. - Developed a consistent design system for seamless user interaction and navigation.	2025
<u>Auto Care – Vehicle Service & Fuel Station Management System</u> <i>Java · JSP · CSS · Apache Tomcat · MySQL · Eclipse IDE</i> - Developed the customer service request management module for a vehicle service and fuel station platform. - Implemented request submission, tracking, status management, and CRUD functionalities using Java, JSP, and MySQL. - Integrated frontend and backend components to support efficient customer support operations. - Deployed and tested the application using Apache Tomcat within the Eclipse development environment.	2025
<u>Institute of Information & Web Technologies – University Student Help Desk</u> <i>HTML · CSS · PHP · MySQL</i> - Developed the notice management module for a university student help desk platform. - Implemented notice creation, updating, deletion, and dynamic display functionalities using PHP and MySQL. - Designed responsive user interfaces with HTML and CSS for effective information dissemination. - Integrated database-driven notice publishing and management features to support student communication.	2024
